

# SmartCHEM summit

bio-based production and new business from industrial sidestreams

22th May 2018

Turku, Finland.

---

**SmartCHEM summit** presents the latest innovations in bio-based production and solutions for creating new businesses from industrial side streams. The event gathers industry, growth companies, experts and academics from Finland and Europe on **May 22th 2018** to the brand new [Visitor Centre Joki](#) in **Turku, Finland**.

During the event you'll hear inspiring speeches from policy makers, industry and companies. The focus is on new solutions and business models for a modern sustainable process industry.

At the event [IBC Finland](#) organizes a Hackathon, to which all seminar attendees are warmly welcome. The Hackathon brings together companies and research institutes to discuss sustainable solutions under several themes including forest industry side-streams, biotechnology and waste water treatment.

SmartCHEM summit is an official free side event of SHIFT 2018. SHIFT Business Festival gathers 4000 entrepreneurs and experts from different industries to connect and discover unexpected opportunities, as well as craft sustainable solutions for future business in the new era of co-evolution of human and machine.

One day tickets to SHIFT Wednesday for SmartCHEM participants are available here: [www.theshift.fi/tickets](http://www.theshift.fi/tickets)

Event is organized by [Smart Chemistry Park/Turku Science Park Ltd.](#), [Åbo Akademi](#) and [University of Turku](#) in collaboration with [SHIFT](#) Business festival.
